Title *The Historical Research of the Holocaust in Israel*
Abstract This work traces the way the research and Academic tuition of the Holocaust developed in Israel. This touches on issues of The Israeli society and the holocaust such as: the place of Holocaust survivors in society and their contribution to Holocaust research and remembrance; the way the Academic institutions perceived the Holocaust and the influence of public opinion on the development of Holocaust research; the relationship between Israeli Historiography and general Historical research on the Holocaust.
Keywords *Israel, Historiography*

Title *Yiddish Culture in the French Camps (Occupied Zone): Clandestine press, literature and theater*
Abstract Against the background of the Yiddish culture of immigrant Jews in inter-war Paris, Dr. Rosenberg examines the press, theatre and literature produced clandestinely by the inmates of the French Occupied Zone camps, especially Beaune-la-Roland, Pithiviers, Compiègne and Drancy. The press and literature produced in those camps are analyzed in view of parallel clandestine activities executed in Paris by Yiddish journalists and writers, who thereby manifested their resistance to both the Nazi occupier and the Vichy regime. The research will present as full a picture as possible of the Yiddish cultural and spiritual life of the internees, which ironically kept alive the life and culture of the Jewish immigrant community of pre-war France.
